- Change albums from one style to another with just a double click!
- Single click to view photos in full-screen mode. Audio, video and captions can also be previewed in full-screen mode. Video can be dragged to play at any location against the background photo.
- Multiple albums can be opened at the same time. The Album Info window can be displayed show the total album size, number and size of photos and the linked audio/video files.
- Drag and drop to copy or move album entries and the linked audio/video files from one album to the other. What an easy way to create a "best of" album!
- Sort album pages by the creation date or alphabetical order.
- Select and save any photo in an album as a background wallpaper image.
- Print the album page with thumbnail index or the individual photos.
- Toolbar and icon buttons provide easy access to commands

Sharing Features

- Single Archive and Share command to copy, backup, and share the entire album and its associated media files to floppy, Zip/Jaz, CDs, etc.
- Send photos (with optional audio, video, and URL attachments) via email.
- Share photos by publishing multimedia web pages. Living Album's Web Page Wizard provides you with step-by-step guidance. There's no need to send photo prints or audio and video tape anymore! Send Living Album files or the URLs for your multimedia web pages instead. ([Click here to see a sample photo home page and the photo web pages created by Living Album.](#))

Slide Show Features

- Living Album offers unmatched slide show features. Create a slide show with photos, audio, video and MIDI. Video can be played at any location against the background photo.
- Slide shows can be controlled manually or automatically.
- In addition to moving slides forwards, slide show can be paused and resumed (by pressing the space bar) and moved backwards (by holding down the Shift key and clicking the mouse button) at any time, even in the automatic mode.
- Photo captions can also be displayed in the slide show.
- Over fifty transition (visual) effects can be applied.
- Slide show options can be set globally or customized for each album entry!

Multimedia Features

- Record or attach a WAV audio file to each album entry.
- Attach an AVI video file to each album entry. Video can be played at any location against the background photo in the full-screen view and in the slide show!
- Attach and play background MIDI music file continuously in each album page and in the slide show.
- Send multimedia email with the photo, audio, video, and URL attachments of any album entry.

- Publish and share multi-column, multimedia web pages with photos, sound and video clips.

Import/Export & Editing Features

- Import one or multiple images directly from any TWAIN-compatible scanner or digital cam
- Copy any photo entry and paste it into any other document.
- Import or record WAV sound files and import AVI video files.
- Import/export, edit, and archive all major image file formats including BMP, CALS, DIB, E FAX (raw), GIF, IMG, IOCA, JPEG (JPG, JFIF, JTIF), MSP, PCD (Photo CD), PCT or PIC (Macintosh), PCX, PNG, PSD, RAS, TGA, TIFF, VDA, VST, WINFAX, WMF, WPG, and FPX (FlashPix).
- Photo editing includes: zooming, rotating, cropping, and changing contrast, brightness, and colors. You can edit all the photos in an album page from within a single editing window! No other software offers this unique feature!

Club Photo/Internet Features

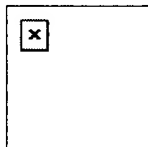

- Living Album 99 is fully integrated with the Club Photo Network and the Internet - including multimedia emailing, web page publishing and embedding URLs in album pages and individual entries.
- The Web Page Export Wizard allows anyone to generate multi-column, multimedia web pages quickly and automatically publish them to your own Club Photo web site! ([Click here to see sample home page and the photo web pages created by Living Album.](#))
- Customize the optional member profile information (logo, nick name, bio, email address, etc) displayed in your Club Photo Web site.
- Use Web Page Manager to preview or delete photo web pages published to your own Club Photo Web site.

Database Features

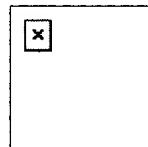

- Behind the beautiful album styles, each album file is actually a **relational database** that can store an unlimited number of photos with text/audio/video/URLs, etc. In fact, you can use Microsoft Access to open and modify your album file!
- Find and locate photos instantly by keywords in captions/descriptions or by date.
- Backup the entire album and its associated media files to floppy, Zip, Jaz, CDs, etc. with a single Archive and Share command.
